PA0276111, Pesticides, SIC Code 0782, Paupackan Lake Association, Inc., 128 Sheridan Road, Hawley, PA 18428.

Description of Proposed Activity: The application is for a new NPDES permit for a new discharge associated with the application of pesticides in Lake and Paupack Townships, Wayne County.

The receiving water, Paupackan Lake, is located in State Water Plan Watershed 01C and is classified as High Quality—Cold Water Fishes for aquatic life, water supply and recreation. An anti-degradation analysis has been completed to document that pesticide application activities in High Quality (HQ) or Exceptional Value (EV) waters will be conducted in a manner that minimizes adverse environmental effects. The proposed permit contains conditions that require implementation of Pest Management Measures, Recordkeeping and Annual Reporting Requirements, Corrective Action Documentation and Reporting, and a Pesticides Discharge Management Plan.

You may make an appointment to review the DEP files on this case by calling the File Review Coordinator at 570.826.5472. PA0272612, Pesticides, SIC Code 4959, US DOI Fish & Wildlife Service, 3090 Wright Street, Marquette, MI 49855-9649.

Description of Existing Activity: The application is for a renewal of an NPDES permit to treat tributary streams to Lake Erie in Erie and Crawford Counties using a lampricide for the control of sea lamprey (Petromyzon marinus), an invasive species associated with significant damage to the Great Lakes fishery.

The receiving streams are tributaries to Lake Erie located in State Water Plan watershed 15X and are classified for migratory fishes, cold water fishes, warm water fishes, special protection and aquatic life, water supply and recreation. Applicators are required to follow product labeling instructions of pesticides, which may include provisions to reduce application doses and notify public water suppliers in the event applications are conducted near public water supply intakes. The discharges associated with the pesticide applications are not expected to affect public water supplies.

The Department has made a tentative determination to issue the NPDES permit subject to the terms and conditions of the permit. An anti-degradation analysis has been completed to document that pesticide application activities in High Quality (HQ) or Exceptional Value (EV) waters will be conducted in a manner that minimizes adverse environmental effects. The proposed permit contains conditions that require implementation of Pest Management Measures, Recordkeeping and Annual Reporting Requirements, Corrective Action Documentation and Reporting, and a Pesticides Discharge Management Plan.

The permit contains major special conditions including: protection of surface water supply areas, timing of treatment restrictions for non-target aquatic species and recreational fishing, threatened and endangered species protection and significant public notice to treatment areas and dates

You may make an appointment to review the DEP files on this case by calling the File Review Coordinator at 814-332-6340. You may submit written comments on the application and draft permit within 30 days to the address above. After the 30-day comment period, the Department will make a final determination on the issuance of the permit.

The EPA waiver is not in effect.

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the Pennsylvania Bulletin an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of...
the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department’s analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department’s Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the Pennsylvania Bulletin or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.
Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act (35 P.S. §§ 4001–4015) and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.

(502 North Keystone Ave., South Waverly, PA 18840-2943) for the construction of a crematory unit at the Northern Bradford Crematory facility located in South Waverly Borough, Bradford County. The Department of Environmental Protection’s (Department) review of the information submitted by Richards Funeral Home, Inc. indicates that the air contamination sources to be constructed will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12. Based on this finding, the Department proposes to issue a plan approval for the proposed construction. The emission from the proposed source included in this project will not exceed the following limits: 1.15 tons particulate matter in order to include particulate matter less than 10 microns and less than 2.5 microns), 0.72 ton of carbon monoxide, 0.87 ton of nitrogen oxides, 0.53 ton of sulfur oxides, 0.07 ton of volatile organic compounds, 0.02 ton of hazardous air pollutants, and 561.65 tons of carbon dioxide equivalent. In addition to the emission limitations, the following is a brief description of the types of conditions the Department intends to place in the plan approval in order to ensure compliance with all applicable air quality regulatory requirements: The particulate matter emissions from the crematory shall not exceed 0.08 grain per dry standard cubic foot of exhaust, corrected to 7% oxygen; The visible emissions from the crematory shall not equal or exceed 10% opacity for a period or periods aggregating more than 3 minutes in any one hour or equal or exceed 30% opacity at any time; The crematory shall only be fired on natural gas or LP gas; Only human remains and associated containers, which are constructed of cardboard, particleboard or wood, shall be incinerated in the crematory. Under no circumstances shall the crematory be used for the incineration of hospital waste, infectious waste or any other type of waste other than human remains and associated containers; The crematory shall be equipped with instrumentation to continuously monitor and record the primary and secondary combustion chamber exit temperatures any time the crematory is in operation; The crematory shall be equipped with instrumentation to continuously monitor the opacity of the effluent gas any time the crematory is in operation; A secondary combustion chamber temperature of at least 1,800°F shall be maintained for a residence time of at least one (1) second at any time that cremation is occurring in the crematory; The crematory shall be equipped with an interlock which prevents the primary combustion chamber burner from firing unless the secondary combustion chamber is at a temperature of at least 1800°F; The crematory shall be equipped with an interlock which prevents the primary combustion chamber burner from firing and sounds an alarm any time the opacity of the visible emissions exceeds 10%; The charge door of the crematory shall be kept shut during the cremation cycle except for short periods of time in order to inspect and/or reposition the remains; The crematory shall not be operated more than 4,368 hours in any 12 consecutive month period; The permittee shall keep accurate and comprehensive records of the number of hours the crematory is operated each month; The permittee shall maintain accurate and comprehensive records of the primary and secondary combustion chamber temperature chart recordings.

The facility is a State Only facility. If the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for Plan Approval 08-00025B, the requirements established in the plan approval will be incorporated into State Only Operating Permit 08-00025 pursuant to the administrative amendment provisions of 25 Pa. Code § 127.450. All pertinent documents used in the evaluation of the application are available for public review during normal business hours at the Department’s Northcentral Regional office, 208 West Third Street, Suite 101, Williamsport, PA 17701. Appointments for scheduling a review must be made by calling 570-327-0550.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.
More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the Pennsylvania Bulletin and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

To remove an existing stormwater outfall structure and to construct and maintain a stormwater outfall within the floodway of the Lehigh River (WWF, MF) consisting of a 42-inch diameter reinforced concrete pipe, concrete endwall, and a 22-foot long, 33-foot wide R-3 riprap apron. The project is located along the western bank of the Lehigh River, approximately 0.1 mile east of the intersection of W. Chew Street and N. Front Street (Allentown East, PA Quadrangle Latitude: 40°36’ 40.7’’ Longitude: -75° 27’ 20.0’’) in City of Allentown, Lehigh County.

To construct and maintain the following water obstructions and encroachments associated with the Bethlehem LNG project.

1. A roadway crossing of East Branch Saucon Creek (CWF, MF) consisting of 7.5-foot high by 36-foot wide box culvert depressed 12-inches below the existing streambed elevation with concrete wingwalls. This activity also includes approximately 25,531 square feet of fill in the floodway for construction of the roadway.

2. To place approximately 2,223 square feet of fill within the floodway of the East Branch Saucon Creek (CWF, MF) for the construction of stormwater management facilities for a commercial facility. This activity extends for approximately 700 linear feet upstream from where the new proposed roadway crossing intersects the East Branch Saucon Creek (CWF, MF).

3. To place approximately 8,591 square feet of fill within the floodway of a UNT to East Branch Saucon Creek (CWF, MF) for the construction of an access road, parking areas and stormwater management facilities for a commercial facility. This activity extends for approximately 1,000 linear feet upstream from where the UNT to East Branch Saucon Creek (CWF, MF) intersects the East Branch Saucon Creek (CWF, MF).

4. A 12-inch water line crossing of the East Branch Saucon Creek (CWF, MF).

Plan Description:

The Act 537 Plan Revision was approved by DEP on March 12, 2018.

The Department of Environmental Protection (DEP) has reviewed Mahanoy and Ryan Townships Act 537 Official Sewage Facilities Plan Revision for the Mahanoy Business Park/Bedinsky Airport Parcel Subdivision (the Plan). The Plan was prepared by Alfred Benesch Engineers and received by the Department on December 8, 2017.

The proposal consists of the creation of three (3) warehouses of 1.1 million square feet; 850,000 square feet and 500,000 square feet, respectively. It is estimated the commercial lot will produce 50,000 gallons per day of sewage flow. The sewage flow of 50,000 gallons per day will be collected, conveyed and treated by a proposed wastewater treatment plant built on site that will be owned and operated by the Schuylkill County Municipal Authority.

The proposed treatment plant will discharge to Codorus Creek, which is classified as CWF (cold water fishes).

The Department’s review of the Act 537 Plan Revision has not identified any significant environmental impacts resulting from the proposal.

Any required NPDES Permits or WQM Permits must be obtained in the name of the Schuylkill County Municipal Authority.

Plan Description: The request for planning exemption submitted for the Darrell Naylor Subdivision, DEP Code No. A3-34917-212-2E, APS Id 963252, is disapproved. The purpose of this plan is to create one new residential building lot to use an individual onlot sewage disposal system, and a residual tract with an existing dwelling and onlot sewage disposal system. The project is located on the south side of Jonestown Road, west of the junction with Saner Lane. The submission does not qualify for the use of the planning exemption because the proposed building lot is underlain by carbonate geology. See Chapter 71, Section 7(b)(1)(iii).

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the Pennsylvania Bulletin a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the Pennsylvania Bulletin. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

The project site is located along the Southern Beltway (S.R. 0576), at the interchange with Westport Road (formerly Bald Knob Road/T-439), within the Potato Garden Run (WWF) and St. Patrick’s Run (WWF) watersheds (Clinton, PA Quadrangle; Latitude: 40° 26′ 59″; Longitude: −80° 20′ 42″), in Findlay Township, Allegheny County. To compensate for these impacts, approximately 324′ of watercourse will be reestablished through the breach area, and approximately 1.55 acre of wetland will be created within the former impoundment area.

E02-1774, Port Authority of Allegheny County, 345 Sixth Avenue, Third Floor, Pittsburgh, PA 15222, Municipality of Bethel Park, Allegheny County, Pittsburgh ACOE District.

This project will permanently impact 117 linear feet of watercourse and 0.05 acre of floodway/floodplain. The project will temporarily impact 136 linear feet of watercourse and 0.06 acre of floodway/floodplain. Mitigation for the stream impacts will be through restoration and depressing the box culvert. The project is located approximately 0.22 mile south of the intersection of Fort Couch Road and Bethel Church Road (Bridgeville, USGS topographic quadrangle, Latitude: 40°19′57″; Longitude: −80°3′10″; Sub-basin: 20F; Pittsburgh Corps District), in the Municipality of Bethel Park, Allegheny County.

6. A new outfall structure (to replace an existing structure) within Little Chartiers Creek;
7. Stormwater management facilities, including outfall structures, along the UNT and/or within the floodplain of the UNT and Little Chartiers Creek;

For the purpose of improving sewage treatment within the Donaldson’s Crossroads service area, and to potentially accommodate the Lehner Lakes service area. The project will affect approximately 60 LF of watercourse. Mitigation is not required for the impacts. The project is located near the intersection of Oakwood Road and West McMurray Road (SR 1002), in Peters Township, Washington County (Canonsburg, PA USGS topographic quadrangle; Latitude: 40° 16’ 37.08”; Longitude: -80° 11’ 42”; Sub-basin: 20F; USACE Pittsburgh District).

The project will result in a de minimus permanent impact of approximately 290 square feet of palustrine scrub-shrub (PSS) wetland. Approximately 75 linear feet of Richey Run will be relocated upstream of the proposed box culvert to prevent road embankment erosion.

ENVIRONMENTAL ASSESSMENT

Cambria District: Contact Person: Patrick M. Webb, 286 Industrial Park Road, Ebensburg, PA 15531-4119.

The applicant will backfill four abandoned dangerous coal highwalls that total 5,500 linear feet in length and vary from 25—50 feet high. Two non-discharging trapped surface stormwater runoff areas that are impaired by acid mine drainage (AMD) will be filled within the dangerous coal highwalls. The on-site adjacent acidic coal mine spoil materials will be regraded to backfill the abandoned dangerous coal highwall areas. The two non-discharging trapped surface stormwater runoff areas that are impaired by AMD total 0.98 acre. There are no associated wetlands on site due to the acidic coal mine spoils, AMD and steep to vertical topography. (Cranberry Quadrangle 41° 21’ 58” N, 79° 19’ 55” W).

Approval of a Reasonably Available Control Technology (RACT II) plan for JELD-WEN, Inc., Fiber Division—PA located in Wysox Township, Bradford County.

The proposed SIP revision does not adopt any new regulations. It incorporates the provisions and requirements contained in the amended RACT II approval for the facility, which are intended to satisfy the requirements for the 1997 National Ambient Air Quality Standard (NAAQS) and the 2008 NAAQS for ozone.

The proposed amendments to the RACT II determination, if finally approved, will be incorporated into a revised operating permit (08-00003) for the facility. The relevant RACT II requirements will be submitted to the United States Environmental Protection Agency (EPA) as a revision to Pennsylvania's State Implementation Plan and will remain in effect until replaced under 40 CFR 51 and approval by the EPA. Requirements that are not part of the RACT II determination will be excluded from the SIP submittal for this facility.

The following is a summary of the proposed amendments to the RACT II determination for this operation that will be submitted to the EPA as a SIP revision:

The following significant changes were made to the final PAG-12 General Permit documents in comparison to the draft General Permit published on January 20, 2018:

- The due date for CAFO annual reports and annual Notice of Intent (NOI) fees has been changed from December 1 to January 1. This change will allow permittees additional time to complete annual reports and submit fees. The reporting period for the annual report has not changed (October 1—September 30). As a result of the change to the due date, the Department was able to modify the annual report to request the actual capacity of manure storage facilities at the start of the winter period and eliminate duplicative reporting in the general permit.

- The NOI fee for new CAFOs has been eliminated by the Department. Following the first year of coverage under PAG-12, CAFOs will pay an annual NOI fee of $500 by January 1, starting no earlier than January 1, 2020. Existing CAFOs with coverage under PAG-12 will begin paying the annual fee by January 1, 2020. Thereafter, the annual fee will be due no later than January 1 each year of general permit coverage.
The NOI Instructions were modified to specify that the Department’s Southcentral Regional Office will be the recipient of all PAG-12 NOIs, regardless of where the CAFO is located in this Commonwealth. Annual reports and other notifications will be sent to the Department office that has jurisdiction over the county where the CAFO is located.

The Department has modified the requirement for CAFOs operating under PAG-12 to complete daily inspections of water lines including drinking water or cooling water lines. In the final PAG-12 Permanent Permit, only those CAFOs with at least 700 mature dairy cows (whether milked or dry) or 1,000 cattle, or both, other than mature dairy cows or veal calves will be required to complete daily inspections of water lines.

A requirement for the annual review of nutrient management plans has been removed from the final PAG-12 General Permit, and the CAFO Annual Report has been revised to require confirmation from the permittee that an annual review has been completed to comply with the nutrient management regulations.

The language in the draft PAG-12 General Permit concerning the requirement to maintain operation and maintenance (O&M) plans for all manure storage facilities has been revised. O&M plans must be maintained onsite for all manure storage facilities that were constructed under a Water Quality Management permit or had been developed as a result of prior permit coverage.

Other changes have been made as described in the PAG-12 Comment and Response document and Fact Sheet.

The General Permit package can be accessed through the Department’s eLibrary web site at http://www.depgreenport.state.pa.us/elibrary (select “Permit and Authorization Packages,” then “Clean Water,” then “PAG-12 General Permit”).

In accordance with 25 Pa. Code § 92a.84(c)(2) (relating to public notice of general permits), the Department will publish notice of receipt of every PAG-12 NOI (form 3800-FM-BCW0032b) and every approval of coverage under the PAG-12 General Permit in the Pennsylvania Bulletin.

Bond Rate Guidelines for the Calculation of Land Reclamation Bonds on Coal Mining Operations

The Department of Environmental Protection (Department) announces the 2018 bond rate guidelines for anthracite and bituminous coal mining operations. These rates become effective April 1, 2018. The authority for bonding coal mining operations is found under The Clean Streams Law (35 P.S. §§ 691.1—691.1001), the Surface Mining Conservation and Reclamation Act (52 P.S. §§ 1396.1—1396.19b), the Coal Refuse Disposal Control Act (52 P.S. §§ 30.51—30.66) and 25 Pa. Code Chapter 86, Subchapter F (relating to bonding and insurance requirements). The unit costs listed in these guidelines will be used in calculating the land reclamation bonds for surface coal mining operations including, surface mines, coal refuse disposal sites, coal refuse reprocessing sites, coal processing facilities and the surface facilities of underground mining operations.

The procedures for calculating land reclamation bonds are described in Technical Guidance Document 563-2504-001, “Conventional Bonding for Land Reclamation—Coal,” which is available on the Department’s web site at http://www.elibrary.dep.state.pa.us. The Department calculated the rate of inflation and rate of return using 5-year averages. For the rate of inflation, the Consumer Price Index (Northeast Urban) from the United States Department of Labor, Bureau of Labor Statistics, was averaged for the calendar years 2013—2017, resulting in a rate of 1.10%. This rate of inflation will be used in calculating bond amounts for permit renewal or permit midterm bond liability reviews on or after April 1, 2018.

The Department may review the adequacy of bonds on existing permits based on the bond rate guidelines at any time. The Department will conduct these reviews before issuing permit renewals. The Department may conduct similar reviews at the midterm of a permit and before approving a permit revision.

These bond rate guidelines do not apply to bonds ensuring replacement of water supplies under section 3.1(c) of the Surface Mining Conservation and Reclamation Act (52 P.S. § 1396.3a(c)) or to bonds ensuring compliance with the requirements of The Bituminous Mine Subsidence and Land Conservation Act (52 P.S. §§ 1406.1—1406.21).
General Methodology

The Department developed the bond rate guidelines for 2018 from the unit costs for competitively bid contracts for mine reclamation. Contract bid data is available for various unit operations needed to complete reclamation of a mine site for the years 1998—2017. For most categories, a 3-year (2015—2017) average was used to calculate the guidelines. Some categories required another approach due to limited data. For example, there were no contracts in 2014—2017 that included selective grading. Therefore, a multiyear average of available data was used for the 2018 selective grading bond rate.

In general, the costs for a given unit operation for each year are determined using the weighted average of the three lowest total bids for each contract. However, grading costs were calculated using a frequency distribution in combination with the weighted averages.

In the event that a unit operation necessary to calculate a reclamation bond is not listed in Table 1 or 2, then any additional cost information available may be used. If enough data is still not available, the rate may be set from a standard reference like Means Building Construction Cost Data or Walker’s Building Estimator’s Reference Book. Occasionally, specific unit costs may be adjusted using information provided by BAMR and other stakeholders.

The fees associated with the Land Maintenance Bond Program are presented in Table 3. There has been no change in these rates for 2018.

The bond rate guidelines are available electronically at http://www.dep.pa.gov/Business/Land/Mining/BureauofMiningPrograms/Bonding/Pages/BondRates.aspx. For background information and supporting documentation regarding bonding rate guidelines, contact the Bureau of Mining Programs, Division of Permitting and Compliance, P.O. Box 8461, Harrisburg, PA 17105-8461, (717) 787-5103.

Mine Sealing Costs

The mine sealing bond rate guidelines are presented in Table 2. Mine sealing and borehole sealing bond rate guidelines remain the same for 2018.

Effective Date

The bond rate guidelines in this notice become effective April 1, 2018.

Proposed General Plan Approval and/or General Operating Permit No. 5A for Unconventional Natural Gas Well Site Operations or Remote Pigging Stations (BAQ-GPA/GP-5A); Proposed Modifications to General Plan Approval and/or General Operating Permit No. 5 for Natural Gas Compressor Stations, Processing Plants and Transmission Stations (BAQ-GPA/GP-5); Proposed Modifications to the Air Quality Permit Exemptions List (Doc. No. 275-2101-003); Public Comment Opportunity

The Department of Environmental Protection (Department) announces the opportunity for public comment on the proposed General Plan Approval and/or General Operating Permit for Natural Gas Well Site Operations or Remote Pigging Stations (BAQ-GPA/GP-5A); revisions to the existing General Plan Approval and/or General Operating Permit for Natural Gas Compressor Stations, Processing Plants and Transmission Stations (BAQ-GPA/GP-5); and revisions to the Air Quality Permit Exemptions List (Doc. No. 275-2101-003).

Notice of availability of these documents and opportunity to submit comments for GP-5A, GP-5 and the Exemptions List was published at 47 Pa.B. 733 (February 4, 2017), which initial notice is hereby reissued in accordance with 25 Pa. Code § 127.612(a) (relating to general plan approvals and operating permits). This notice will be published in the Pennsylvania Bulletin and in six newspapers of general circulation, and sent to nearby states and the United States Environmental Protection Agency in full compliance with 25 Pa. Code § 127.612(a). A second notice was published at 47 Pa.B. 1235 (February 25, 2017) to extend the comment period to June 5, 2017. The Department received more than 10,000 comments on the proposals. Based on these comments, the Department made significant changes to GP-5A, GP-5 and the Exemptions List.

The proposed GP-5A was developed under the authority of section 6.1(f) of the Air Pollution Control Act (35 P.S. § 4006.1(f)) and 25 Pa Code Chapter 127, Subchapter H (relating to general plan approvals and operating permits), and will be applicable to unconventional natural gas well site operations or remote pigging stations. The revised GP-5 was developed under the same authorities and will remain applicable to natural gas compressor stations and processing plants and add applicability to natural gas transmission stations.

The proposed GP-5A and revisions to GP-5 include requirements for the following:

1. Natural Gas-Fired Combustion Units—which includes requirements for combustion units rated greater than or equal to 10 MMBtu/h to meet emission limits for oxides of nitrogen (NOx), carbon monoxide (CO) and particulate matter (PM) and for all combustion units to keep records of fuel usage and throughput to facilitate emissions calculations. Combustion units at unconventional natural gas well sites or remote pigging stations are limited to a rating less than 10 MMBtu/h.

2. Glycol Dehydration Units—which includes a control threshold requirement of 200 tpy of methane, 2.7 tpy volatile organic compound (VOC), 0.5 tpy of a single hazardous air pollutant (HAP) or 1.0 tpy of total HAP and a control efficiency requirement of 98% if any of the stated thresholds are exceeded.

3. Stationary Natural Gas-Fired Spark Ignition Internal Combustion Engines—which includes a best available technology (BAT) requirement to meet emission limits for NOx, CO, nonmethane nonethane hydrocarbons (NMNEHC) and formaldehyde.

4. Reciprocating Compressors—which includes the Federal requirements from 40 CFR Part 60, Subpart OOOOa (relating to standards of performance for crude oil and natural gas facilities for which construction, modification, or reconstruction is commenced after September 18, 2015). This includes the requirement to replace the rod-end packing every 26,000 hours of operation or every 3 years.

5. Storage Vessels—which includes a control threshold requirement of 200 tpy of methane, 2.7 tpy VOC, 0.5 tpy of a single HAP or 1.0 tpy of total HAP and a control efficiency requirement of 98% if any of the stated thresholds are exceeded.

6. Tanker Truck Load-Out Operations—which includes a requirement to use a vapor recovery system and that trucks that perform load-out operations are appropriately certified. The requirement is met by keeping records that detail the load-out operations, including the identification (ID) number of the truck performing the load-out and the volume of liquids loaded and keeping a list of trucks authorized to perform load-out operations with an ID number and the date of the most recent certification test.

7. Fugitive Emissions Components—which includes requirements to perform monthly audio, visual and efficacy inspections and quarterly leak detection and repair (LDAR) inspections. LDAR inspections can be performed using an optical gas imaging camera, a Method 21 gas analyzer or other approved methods. For LDAR programs at unconventional natural gas well sites and remote pigging stations, there is an option to track the number of leaking components and reduce the inspection frequency to the Federally required semiannual increment if less than 2% of components are found to be leaking in two consecutive inspections. If 2% or more of components are found to be leaking at the reduced frequency, the LDAR returns to the quarterly schedule.

8. Controllers—which includes a requirement that electric controllers be installed where electricity is available onsite. For sites where electricity is not available onsite, the Federal requirements from 40 CFR Part 60, Subpart OOOOa must be met.

9. Pumps—which includes a requirement that electric pumps be installed where electricity is available onsite. For sites where electricity is not available onsite, the Federal requirements from 40 CFR Part 60, Subpart OOOOa must be met. There are also recordkeeping requirements for pumps that are not subject to 40 CFR Part 60, Subpart OOOOa.

10. Control Devices—which includes the Federal requirements from 40 CFR Part 60, Subpart OOOOa. The only modification of these requirements is that if the option to monitor combustion zone temperature is chosen instead of stack testing an enclosed flare or other combustion device, the combustion zone temperature must be 1,600°F to ensure a 98% methane destruction efficiency.

11. Pigging Operations—which includes the requirement to install a liquids drain in pig receiver chambers.
to route emissions from a high-pressure pig launcher or receiver to a low-pressure vessel or line, a control threshold requirement of 200 tpy of methane, 2.7 tpy VOC, 0.5 tpy of a single HAP or 1.0 tpy of total HAP, and a control efficiency requirement of 98% if any of the stated thresholds are exceeded.

The proposed GP-5A also includes the following additional requirements:

(1) Well Drilling and Hydraulic Fracturing Operations—which includes requirements to notify the Department at least 24 hours prior to the beginning of either type of operation and ensuring that engines used during the operation meet the applicable nonroad engine standards. Records of engine usage are required to facilitate emissions calculations.

(2) Well Completion Operations—which includes the Federal requirements from 40 CFR Part 60, Subpart OOOOa. This includes the requirement to perform a reduced emissions completion, also known as Green Completion, to notify the Department at least 24 hours prior to the beginning of flowback and to keep records of the duration of flowback and the disposition of gas during the flowback period.

(3) Wellbore Liquids Unloading Operations—which includes a requirement that an operator remain onsite for the duration of a manual unloading operation.

The proposed GP-5 also includes the following additional requirements:

(1) Stationary Natural Gas-Fired Combustion Turbines—which includes a BAT requirement for turbines rated above 1,000 hp to meet emission limits for NOx, CO, NMNEHC and PM.

(2) Centrifugal Compressors—which includes the Federal requirements from 40 CFR Part 60, Subpart OOOOa, except that the required control efficiency is 98%. There are also recordkeeping requirements for centrifugal compressors that are not subject to 40 CFR Part 60, Subpart OOOOa.

The general permits include emission limits, testing, monitoring, recordkeeping and reporting requirements designed to keep the facility operating within all applicable State and Federal air quality requirements. The general permits also include the fee required to authorize the construction and operation of sources. The term for general permit is 5 years and authorization can be renewed before the expiration date.

The Department proposes to make changes to the Air Quality Permits Exemption List under 25 Pa. Code § 127.14(a)(8) (relating to exemptions), Category Nos. 35 and 38; under 25 Pa. Code § 127.14(a)(9), Category No. 16; and under the Trivial Activities provision, Category No. 40.

These documents are available on the Department's Bureau of Air Quality web site at http://www.dep.pa.gov/Business/Air/BAQ/Permits/Pages/GeneralPermits.aspx and by contacting Frank Zarefoss, P.O. Box 8468, Harrisburg, PA 17105, (717) 787-4325 or fzarefoss@pa.gov.

The Department must receive comments no later than May 15, 2018. Commentators are encouraged to submit comments using the Department’s eComment system at www.ahs.dep.pa.gov/eComment or by e-mail to ecomment@pa.gov. PENNSYLVANIA PUBLIC UTILITY COMMISSION
Business Discount Plan, Inc.

Public Meeting held
March 15, 2018

Commissioners Present: Gladys M. Brown, Chairperson; Andrew G. Place, Vice Chairperson; Norman J. Kennedy; John F. Coleman, Jr.; David W. Sweet

Business Discount Plan, Inc.; A-2017-2619610

Tentative Order

By the Commission:

Business Discount Plan, Inc. (BDP or Company), utility code 310262, is a Competitive Local Exchange Carrier (CLEC) certified by this Commission at Docket No. A-310262.

On July 11, 2017, a copy of BDP’s 2016 Assessment Report was returned to the Commission via U.S. Mail. On the envelope was a handwritten return to sender note stating that the Company was closed. On August 24, 2017, a Secretarial Letter was sent to BDP, detailing the process by which a public utility wishing to cancel its Certificate of Public Convenience in Pennsylvania must file an Application for Abandonment, and the requisite $350 filing fee. The Secretarial Letter warned that failure to comply would lead to the matter being referred to the Bureau of Investigation and Enforcement. An Application for Abandonment form was enclosed with the Secretarial Letter. BDP filed no response to the Secretarial Letter.

On September 20, 2017, a second Secretarial Letter was sent to BDP, again requesting that the Company complete and file the attached Application for Abandonment and submit the associated filing fee. The second Secretarial Letter also included instructions on how BDP could request a waiver if the Company could not afford to pay the $350 filing fee. The second Secretarial Letter also warned BDP that failure to comply within 30 days would result in the matter being referred to Commission legal staff for further action.

To date, BDP has filed no response to either the August 24, 2017, or September 20, 2017 Secretarial Letters. The Company has not filed an Application for Abandonment, nor the associated filing fee or any request to waive the filing fee.

Public utilities seeking to abandon service must file an application to abandon, including payment of a $350 service fee, pursuant to 52 Pa. Code § 1.43. Here, BDP failed to submit the appropriate application and fee, despite the Commission’s twice providing the proper application form.

The Commission has the authority under the Public Utility Code to ensure timely compliance with our regulations and orders including the ordering of such other remedy as the Commission may deem appropriate. 66 Pa.C.S. §§ 504, 505, 506, and 3301. Based on the above facts, we believe it is appropriate to revoke BDP’s Certificate of Public Convenience without the necessity of a formal complaint.

Although the U.S. Mail represented that BDP is no longer in business, the Commission has no record of the Company’s closure. Therefore, given BDP’s failure to pay the required $350 fee or submit the proper application to abandon service, BDP is warned that, should the Company re-apply for authority to provide service in the Commonwealth of Pennsylvania at any time in the future, it shall be required to pay both the instant delinquent $350 fee to abandon service, the $350 fee associated with its application to begin service, and any other fees, assessments, or fines associated with BDP’s utility code 310262, prior to any grant of authority.

For these reasons, we tentatively conclude that revocation of BDP’s Certificate of Public Convenience pursuant to 66 Pa.C.S. § 1102(a)(2) is in the public interest. We take this action on a tentative basis because of BDP’s failure to serve the application on appropriate parties or provide public notice of its abandonment. With the cancellation of BDP’s Certificate of Public Convenience, the Commission will forego the imposition of penalties under Section 3301, which may have been appropriate; Therefore,

It Is Ordered That:

1. Revocation of Business Discount Plan, Inc.’s certificate of public convenience is hereby tentatively approved as being in the public interest.

2. Should Business Discount Plan, Inc. re-apply for authority to provide service in the Commonwealth of Pennsylvania at any time in the future, it shall be required to pay both the instant delinquent $350 fee to abandon service and the $350 fee associated with its application to begin service, and any other fees, assessments, or fines associated with Business Discount Plan, Inc.’s utility code 310262, prior to any grant of authority.

3. The Secretary serve a copy of this Tentative Order upon the Office of Consumer Advocate, the Office of Small Business Advocate, and the Bureau of Investigation &
Enforcement, and also cause a copy of this Tentative Order to be published in the Pennsylvania Bulletin with a 30-day comment period.

4. Absent the filing of adverse public comment within 30 days after publication in the Pennsylvania Bulletin, the Bureau of Technical Utility Services shall prepare a Final Order for entry by the Secretary and shall advise the affected Bureaus within the Commission in writing that the certificate of public convenience held by Business Discount Plan, Inc., utility code 310262, is cancelled and the case may be closed.

5. Upon entry of the Final Order described in ordering Paragraph No. 3 above, Business Discount Plan, Inc.’s name will be stricken from all active utility lists maintained by the Commission’s Bureau of Technical Utility Services and the Assessment Section of the Bureau of Administration, and the docket shall be closed.

*Taking title to electricity

¹ On March 9, 2018, Dynamis Energy, LLC’s bond was cancelled. To date, Dynamis Energy, LLC has not provided a Commission approved financial security replacement.
As part of its EGS license validation procedures, the Commission's Bureau of Technical Utility Services sent a 90-day Security Renewal Notice Letter to each entity in the Supplier Table above stating that original documentation of a bond, or other approved security, must be filed within 30 days prior to each entity's security expiration date. None of the companies listed in the Supplier Table provided the required documentation.

Based on the above facts, we tentatively conclude that the EGSs listed in the Supplier Table are not in compliance with 52 Pa. Code § 54.40(a) and (d) and therefore it is appropriate to initiate the cancellation process for each EGS license of each company listed in the Supplier Table, without the necessity of a formal complaint, as being in the public interest; Therefore,

It Is Ordered That:

1. Cancellation of the Electric Generation Supply Licenses of each company listed in the Supplier Table is hereby tentatively approved as being in the public interest.

2. The Secretary serve a copy of this Tentative Order upon the Office of Consumer Advocate, the Office of Small Business Advocate, the Bureau of Investigation & Enforcement, Department of Revenue—Bureau of Corporation Taxes, all electric distribution companies, all of the Electric Generation Suppliers in the Supplier Table and also cause a copy of this Tentative Order to be published in the Pennsylvania Bulletin with a 30-day comment period.

3. Absent the filing of adverse public comment or the filing of an approved security within 30 days after publication in the Pennsylvania Bulletin, the Bureau of Technical Utility Services shall prepare a Final Order for entry by the Secretary.

4. Upon entry of the Final Order described in Ordering Paragraph No. 3 above, each company listed in the Supplier Table will be stricken from all active utility lists maintained by the Commission's Bureau of Technical Utility Services and the Assessment Section of the Bureau of Administration, removed from the Commission's website, and notifications be sent to all electric distribution companies in which the Electric Generation Suppliers are licensed to do business.

5. Upon entry of the Final Order described in Ordering Paragraph No. 3, each electric distribution company in which the Electric Generation Suppliers are licensed to do business, shall return the customers of the Electric Generation Suppliers to default service.
