DEPARTMENT OF BANKING AND SECURITIES

Maximum Lawful Rate of Interest for Residential Mortgages for the Month of June 2019

The Department of Banking and Securities (Department), under the authority contained in section 301 of the act of January 30, 1974 (P.L. 13, No. 6) (41 P.S. § 301), determines that the maximum lawful rate of interest for residential mortgages for the month of June 2019, is 5 1/4%.

The interest rate limitations under the Commonwealth's usury statute were pre-empted to a great extent by Federal law, the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub.L. No. 96-221). Further pre-emption was instituted with the signing of Pub.L. No. 96-399, which overrode State interest rate limitations on any individual who finances the sale or exchange of residential real property which the individual owns and which the individual occupies or has occupied as his principal residence.

Each month the Department is required by State law to compute and announce the ceiling rate on residential mortgages in this Commonwealth. This maximum rate is determined by adding 2.50 percentage points to the yield rate on long-term government bonds as published by the Federal Reserve Board or the United States Treasury, or both. The latest yield rate on long-term government securities is 2.74 to which was added 2.50 percentage points for a total of 5.24 that by law is rounded off to the nearest quarter at 5 1/4%.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION UNDER ACT 2, 1995 PREAMBLE 1

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the Pennsylvania Bulletin an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department’s analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department’s Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the Pennsylvania Bulletin or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

50-05001A: Texas Eastern Transmission/Shermans Dale (425 Texas Eastern Road, Shermans Dale, PA 17090) for the construction of two (2) new natural gas-fired simple cycle turbines at the Shermans Dale Compressor Station located in Carroll Township, Perry County. These new turbines will replace two (2) GE turbines. The turbines will be built with SoLoNOx dry low NOx (DLN) technology for the control of NOx and equipped with oxidation catalysts for the control of CO, VOCs and organic hazardous air pollutants (HAPS). The facility is also replacing the current 440 bhp emergency generator (Source ID 033) with a Waukesha VGF48GL 1,175 bhp, natural gas, emergency generator. The project will also include the installation of two additional Chemical Vapor Deposition Reactors. The proposed sources would be Reactors 18 & 19 at their facility located in the City of St. Marys, Elk County. The source’s emissions would be controlled by a scrubber. This is an existing non-Title V facility.

06-05033A: Texas Eastern Transmission/Bernville (306 Station Road, Robesonia, PA 19551) for the construction of two (2) new natural gas-fired simple cycle turbines at the Bernville Compressor Station located in North Heidelberg Township, Berks County. These new turbines will replace two (2) GE turbines. The turbines will be built with SoLoNOx dry low NOx (DLN) technology for the control of NOx and equipped with oxidation catalysts for the control of CO, VOCs and organic hazardous air pollutants (HAPS). The facility is also replacing the current 445 bhp emergency generator (Source ID 033) with a Waukesha VGF48GL 1,175 bhp, natural gas, emergency generator. The project will also include the installation of two (2) fuel gas heaters, each rated at 1.47 MMBtu/hr heat input, and five (5) 33-gallon separator vessels used to collect pipeline liquids. The expected facility emissions as a result of the changes proposed are: NOx 57 tpy, CO 72 tpy, PM2.5 11 tpy, PM10 11 tpy, SO2 23 tpy, VOCs 44 tpy and HAPs 5 tpy. The facility will be a State Only facility upon completion of the project. DEP’s review of the information submitted by the applicant indicates that the air contamination sources as constructed or modified will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12, and 40 CFR Part 60, Subpart OOOOa—Standards of Performance for Stationary Spark Ignition Internal Combustion Engines. Based on these findings, the Department proposes to issue a plan approval for the proposed construction. If, after the project has been implemented, the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval will be incorporated into an Operating Permit pursuant to the administrative amendment provisions of 25 Pa. Code § 127.450.

43-386A: Sandy Creek Monument and Cremation Company (312 W. Park St, Franklin, PA 16323), The Department of Environmental Protection intends to issue a plan approval to Sandy Creek Monument and Cremation Company to provide authorization for the construction and initial operation of a human crematory at their existing “Black Funeral Home” facility located in Sandy Creek Borough, Mercer County.

This application proposes the installation of a new source at a non-Title V facility. Public notice is obligatory for sources required to obtain a Plan Approval in accordance with 25 Pa. Code § 127.44.

The operator intends to open the crematory’s door during operation in order to reposition remains and to reduce cremation cycle times. This crematory was not eligible for authorization under General Plan Approval 14 per the Department’s instruction that those facilities which open their primary chamber’s door during operation, could no longer use the general permit. Special conditions will be included in this plan approval which
address door opening and its impact on emissions and operation. The crematory will be required to meet all emission and temperature requirements while the door is opened and will have additional recordkeeping and monitoring requirements.

The Plan Approval will contain testing, recordkeeping, emission restriction, reporting, and work practice requirements designed to keep the facility operating within all applicable air quality requirements. Potential emissions from the proposed source are estimated to be: less than 2.5 tons per year (tpy) of particulate matter, less than 1.0 tpy (each) of SO₂, NOₓ, CO, VOC, and HAP.

In accordance with 25 Pa. Code § 127.44(e)(1), all the pertinent documents regarding this application (applications, review memos, and draft approvals) are also available for review from 8:00 a.m. to 4:00 p.m. at the Meadville Regional DEP Office (Air Quality). Appointments for scheduling a review must be made by calling the DEP at (814) 332-6940.

In accordance with 25 Pa. Code § 127.44(e)(2), a 30-day comment period, from the date of publication, will exist for the submission of comments. Any person(s) wishing to provide DEP with additional information, which they believe should be considered prior to the issuance of this permit, may submit the information to Regional Air Quality Program Manager, Pennsylvania Department of Environmental Protection, 230 Chestnut Street, Meadville, PA 16335-3494 and must contain the name, address and telephone number of the person submitting the comments; identification of the proposed plan approval [43-386A: Sandy Creek Monument and Cremation Company] and a concise statement regarding the relevancy of the information or objections to the issuance of the permit.

A public hearing may be held, if the Department of Environmental Protection, in its discretion, decides that such a hearing is warranted based on the comments received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or the Pennsylvania Bulletin or by telephone, where DEP determines such notification is sufficient. In accordance with 25 Pa. Code § 127.45, a person may oppose the proposed plan approval by filing a written protest with the Department’s Northwest Region. Written comments or requests for a public hearing should be directed to Eric A. Gustafson, 230 Chestnut St., Meadville, PA 16335; Phone (814) 332-6819.

OPERATING PERMITS

The significant permit modification will also address the removal of #2 oil as fuel for several sources, and the addition of emission caps for two sources.

In accordance with 25 Pa. Code §§ 129.91—129.100, the Department of Environmental Protection has made a preliminary determination to approve a RACT 2 plan for the previously-mentioned facility.

The proposed SIP revision does not adopt any new regulations. It incorporates the provisions and requirements contained in the RACT 2 approval, which are intended to satisfy the requirements for the 1997 National Ambient Air Quality Standard (NAAQS) and the 2008 NAAQS for ozone.

The proposed RACT 2 plan will be issued as a significant modification to the facility’s Title V operating permit (44-05001). The relevant RACT2 requirements will also be submitted to the U.S. Environmental Protection Agency (EPA) for approval and incorporation into Pennsylvania’s State Implementation Plan. Requirements that are not part of the RACT2 approval will be excluded from the SIP submittal.

The following is a summary of the proposed RACT2 requirements for this facility that will be submitted to the EPA as part of the SIP:

**RACT 2 Case-by-Case Requirements [25 Pa. Code § 129.99]:**

The following is a case-by-case RACT 2 determination for the indicated sources, pursuant to 25 Pa. Code § 129.99:

(a) Sources 204, 401 and 404 shall each be equipped with low-NOₓ burners.

(b) Sources 204, 401 and 404 shall combust only natural gas.

(c) The permittee shall maintain and adhere to an operation and maintenance plan for each of Sources 204, 401 and 404, which shall address good operation and maintenance practices for the minimization of NOₓ and VOC emissions.
(d) The permittee shall maintain records of any maintenance or modifications performed on Sources 204, 401 and 404.

(e) The permittee shall calculate and record the actual annual NOx emissions from Sources 204, 401 and 404 using appropriate emissions factors from U.S. EPA Publication AP-42 or appropriate alternative emission factors based on PADEP review, coupled with appropriate operational and throughput data. Actual fuel use may be monitored at a common natural gas meter and pro-rated based upon maximum heat input of connected furnaces. [Note: Upon approval of this provision by EPA as a SIP revision, this condition (e) shall supersede Condition 5 in RACT 1 Operating Permit 44-2001, to the extent that Condition 5 would apply to Sources 204 or 401.]

(f) The permittee shall maintain written documentation of the items in (c)–(e) previously listed for five years. The records shall be made available to the Department upon written request pursuant to 25 Pa. Code § 129.100(d) and (i).

Each written comment must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Operating Permit (specify Operating Permit SOOP-11-00412), and concise statements regarding the relevancy of the information or objections to issuance of the Operating Permit.

All comments must be received prior to the close of business 30 days after the date of this publication. In accordance with 25 Pa Code § 127.428, prior to issuing an operating permit, the Department may hold a fact-finding conference or hearing at which the petitioner, and a person who has properly filed a protest under § 127.426 (relating to filing protests) may appear and give testimony. The Department is not required to hold a conference or hearing. The applicant, the protestant and other participants will be notified of the time, place and
purpose of a conference or hearing, in writing or by publication in a newspaper or the Pennsylvania Bulletin, unless the Department determines that notification by telephone will be sufficient.

10-00363: Allegheny Mineral Hilliards Plant (P.O. Box 1022, One Glade Park East, Kittanning, PA 16201-5022), the Department intends to issue the State Only Operating Permit for the limestone plant located off Nagy Road in Washington Township, Butler County. The facility is a Natural Minor. The primary sources at the facility include material handling, a crusher, vibratory screens, storage piles, and a John Deere Diesel Generator (500 hp). Fugitive emissions are minimized by a wet spray system. The permit contains emission restrictions, recordkeeping, work practice, and additional requirements to ensure compliance with the Clean Air Act and the Air Pollution Control Act. The emergency generator engine is subject to 40 CFR 63 Subpart ZZZZ pertaining to NESHAPs for Reciprocating Internal Combustion Engines. The plant is subject to 40 CFR 60 Subpart OOOO pertaining to NSPS for Non-Metallic Mineral Processing. The potential emissions of particulate are 14 TPY. The potential filterable PM_{10} emissions are 6 TPY. Potential NO_{x} emissions are 1.5 TPY. Potential CO emissions are 0.5 TPY, and potential VOC emissions are 0.9 TPY. SO_{x} emissions are negligible due to the limited hours of operation and using low sulfur fuel.

43-00361: Reed Oil Company—Elliot Oil Division (408 Erie St., Grove City, PA 16127). The Department is providing notice that they intend to renew a State Only Synthetic Minor Operating Permit for operation of the petroleum products distribution facility located in Grove City borough, Mercer County. The facility’s primary emission source consists of the bulk gasoline plant. The potential emissions of the primary pollutants from the facility after permit limitations are as follows: 35.19 TPY (tons per year) VOC and 1.95 TPY total HAPs; all other criteria pollutants are estimated to be less than 1 TYP. The facility has taken an elective restriction of 20,000 gallons per day of gasoline throughput per day to maintain synthetic minor status. The gasoline plant is also subject to GP-2 (general operating permit) conditions for storage tanks of VOLs and 40 CFR Part 63 Subpart BBBBBB, the NESHAP for Gasoline Distribution Bulk Terminals, Bulk Plants, and Pipeline Facilities. The renewal permit will contain emission restrictions, recordkeeping, work practices, and additional requirements to ensure compliance with the Clean Air Act and the Air Pollution Control Act.

**MINING ACTIVITY NPDES DRAFT PERMITS**

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

**Effluent Limits for Coal Mining Activities**

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<table>
<thead>
<tr>
<th>Parameter</th>
<th>30-Day Average</th>
<th>Daily Maximum</th>
<th>Instantaneous Maximum</th>

<td>Iron (Total)</td>

<td></td>
</tr>
<tr>
<td>Alkalinity greater than acidity*</td>

</tr>
</tbody>
</table>

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

**Effluent Limits for Noncoal Mining Activities**

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.
In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the Pennsylvania Bulletin and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

PennDOT District 6-0 is proposing to perform the following water obstruction and encroachment activities associated with the SR 0422, Section MAB Advanced Bridge Replacement Project for Pleasantview and Park Road Bridges.

1. To construct and maintain a 54-inch RCP stream enclosure extension from 154 feet to a total length of 192 feet carrying an unnamed tributary to Sanatoga Creek (Stream 1, WWF-MF) and is associated with the placement of fill for roadway embankment construction at Park Road Bridge, north of SR 0422. This activity will result in 38 linear feet (321 square feet) of temporary waterway impact and includes the construction of new headwalls and the placement of riprap rock aprons.

2. To construct and maintain a 24-inch RCP stream enclosure extension from 126 feet to a total length of 130 feet carrying an unnamed tributary to Sanatoga Creek (Stream 4, WWF-MF) associated with minor grading. This activity will result in 4 linear feet (18 square feet) of permanent waterway impact, 187 linear feet (622 square feet) of temporary waterway impact and includes the construction of new headwall and placement of riprap rock apron.

3. To construct and maintain a 174 foot stream relocation associated with the placement of fill for roadway embankment construction at Park Road Bridge, south of SR 0422. This activity will result in 174 linear feet (545 square feet) of temporary waterway impact.

4. To construct and maintain 229 linear feet (2,360 square feet) of new stream channel (Stream 80, WWF-MF) associated with the day-lighting of an existing storm pipe at the Park Road Bridge location south of SR 0422. This activity will result in 23 linear feet (483 square feet) of permanent waterway impact and 27 linear feet (204 square feet) of temporary waterway impact.

5. To relocate, construct and maintain a 30-inch stream enclosure to carry the newly created stream (Stream 80, WWF-MF) and an unnamed tributary to Sanatoga Creek (Stream 2, WWF-MF) at Park Road Bridge south of SR 0422 that will impact a wetland (Wetland 2, PSS). This activity will result in 253 square feet (0.006 acre) of permanent wetland impact, 1,291 square feet (0.030 acre) of temporary wetland impact and downstream riprap apron is included within the 54-inch RCP stream enclosure extension impact.

No resource impacts are associated with the Pleasantview Road Bridge replacement. This project is located at Parks Road and Pleasantview Road along the SR 0422 corridor in Lower Pottsgrove and Limerick Townships, Montgomery County. (USGS PA Phoenixville Quadrangle—Latitude 40.241528, Longitude 75.59361 W).

Montour, LLC (Montour) is proposing the installation of a new 16-mile, 20-inch diameter natural gas pipeline. The new pipeline will provide natural gas to the Montour, LLC Power Plant for regional customer usage. From north to south, the pipeline will run from a proposed pipeline tie-in location in Franklin Township, Lycoming County to a proposed aboveground gas-conditioning facility adjacent to the existing Montour, LLC Power Plant in Derry Township, Montour County. The proposed pipeline is to be constructed within existing and new right-of-way (ROW). The northern 11 miles of the proposed alignment will be collocated within an existing, cleared UGI Sunbury Pipeline ROW, and is typically characterized by maintained fallow and active agricultural fields. The remaining southern 5 miles of the proposed route will consist of new ROW mostly owned by Talen Energy and Montour Generating, LLC. This new southern ROW portion generally consists of fallow, agriculture fields, and/or forested areas. The following table describes a list of the proposed impacts associated with this project.

Sections I—VI contain actions regarding industrial, animal or sewage wastes discharges, discharges to groundwater, and discharges associated with MS4, stormwater associated with construction activities and CAFOs. Section VII contains notices for parties who have submitted NOIs for Coverage under General NPDES Permits. The approval for coverage under these General NPDES Permits is subject to applicable effluent limitations, monitoring, reporting requirements and other conditions in each General Permit. The approval of coverage for land application of sewage sludge or residential septage under applicable general permit is subject to pollutant limitations, pathogen and vector attraction reduction requirements, operational standards, general requirements, management practices and other conditions in the respective permit. The permits and related documents, effluent limitations, permitting requirements and other information are on file and may be inspected and arrangements made for copying at the contact office noted before the action.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act (35 P.S. § 7514) and 2 Pa.C.S. §§ 501—508 and 701—704 (relating to Administrative Agency Law). The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the Pennsylvania Bulletin unless the appropriate statute provides a different time period. Copies of the appeal form and the Board’s rules of practice and procedure may be obtained from the Secretary to the Board. The appeal form and the Board’s rules of practice and procedure are also available in braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should contact a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION
UNDER ACT 2, 1995
PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the Pennsylvania Bulletin a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act’s remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the Pennsylvania Bulletin. These include the remedial investigation report,
risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the Pennsylvania Bulletin a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

24-00012: GrafTech USA, LLC (800 Theresia St., Saint Marys, PA 15857-1831). On May 1, 2019, the Department issued a modification of the Title V Operating Permit to incorporate RACT II case-by-case requirements for the graphite electrode manufacturing facility. The facility is major for VOC and not NOx; thus, the RACT II Review only addresses emissions of VOC. The facility’s primary emission sources include coke unloading, storage, preheaters, screening, crushing, the petroleum coke flour mill, pitch impregnation, mixer, feeder, scale, three (3) natural gas-fueled emergency generators, one (1) diesel-fueled emergency generator, the 48” extrusion press system, a burn-off oven, L.G. coke screening, liquid pitch storage and distribution, air/vegetable oil quench system, pitch storage and coke handling in plant 3, (16) carbottom furnaces, (20) longitudinal graphitizers, sagger sand handling system, (3) parts cleaners, the graphite bagging system, and machining operations. This RACT II major modification addresses two VOC emission sources subject to an alternative RACT proposal pursuant to 25 Pa. Code § 129.99(c), Source 186 (Carbottom Furnaces) and Source 187 (Longitudinal Graphitizers). There are no presumptive RACT II requirements for either source and each has a potential to emit greater than 2.7 tpy of VOC. There are no other VOC emission sources at the facility with a PTE equal to or greater than 1 tpy; thus, all other VOC sources are exempt from RACT II. The highest actual emissions reported in the previous five years are 58.8 tons of VOC from the facility in 2014, which includes 36.98 tons of VOC from 186 and 21.51 tons of VOC from 187. The permit contains emission restrictions, recordkeeping, work practices, and additional requirements to ensure compliance with the Clean Air Act and the Air Pollution Control Act.

The newer boiler is subject to 40 CFR 60 Subpart Dc, Standards of Performance for Small Steam Generating Units. Surface coating processes that utilize chromium-containing material are subject to 40 CFR 63 Subpart HHHHHH, NESHAP for Paint Stripping and Miscellaneous Surface Coating Operations at Area Sources. Non-adhesive surface coating processes are subject to facility-wide emission limits to qualify for exemption from 25 Pa. Code §§ 129.52 and 129.52d. The new walk-in spray booth and drying/staging oven permitted under Plan Approval 20-123F are subject to 25 Pa. Code § 129.57, control of emissions from the use or application of adhesives, sealants, primers, and solvents recordkeeping requirements due to the noncompliance of the surface coatings used. The emergency generator is subject to 40 CFR 60 Subpart JJJJJ, Standards of Performance for Stationary Spark Ignition Internal Combustion Engines. The emergency fire pump is subject to 40 CFR 63 Subpart ZZZZZ, NESHAP for Stationary Reciprocating Internal Combustion Engines. The renewal permit contains emission restrictions, recordkeeping, work practices, and additional requirements to ensure compliance with the Clean Air Act and the Air Pollution Control Act.

1. Construct and maintain an extension to an existing network of stream enclosures that currently totals over 735 linear feet. (The existing stream enclosure network is comprised of a 230-foot long, 8-foot wide, 7-foot high box culvert; a 150-foot long, 8-foot wide, 7-foot high arch culvert; a 300-foot long, 60° RCP; and a 55-foot long 72° RCP.) The proposed structure will connect to the existing box culvert and is proposed to be a 164-foot long, 8-foot wide, 7-foot high precast concrete box culvert. This enclosure will permanently impact 164 linear feet of Unnamed Tributary (UNT) to Beaver Run (HQ-CWF) (aka Stream 1);

2. Relocate an existing, under-ground sanitary sewer line out of the stream channel and onto the adjacent riparian area which will permanently impact 35 linear feet of Stream 1 and 0.01 acre of PEM wetland (aka Wetland 1), and temporarily impact 65 linear feet of Stream 1, 41 linear feet of another UNT to Beaver Run (HQ-CWF) (aka Stream 2), and 0.04 acre of PEM wetland (aka Wetland 1);

For the purpose of developing a Chrysler Millennium vehicle sales and service facility including paved vehicle displays and paved parking areas. Wetland impacts will be restored on-site. Stream impacts will be mitigated for with the purchase of stream credits from the Enlow Fork Mitigation Bank located in Washington County, PA. Notice of Proposed Revision to the State Implementation Plan (SIP) for Oxides of Nitrogen (NOx), Volatile Organic Compounds (VOC), Notice of Public Hearing and Notice of Intent to Issue Revised Air Quality Operating Permit 66-000001

Approval of a Reasonably Available Control Technology (RACT II) plan for Procter & Gamble Paper Products Company (P&G) located in Washington Township, Wyoming County. In accordance with 25 Pa. Code §§ 129.96—129.100, the Department of Environmental Protection (Department) has made a preliminary determination to approve a RACT II plan and an amendment to the SIP for the paper-making process owned and operated by P&G.

The proposed SIP revision does not adopt any new regulations. It incorporates the provisions and requirements contained in the amended RACT II approval for the facility, which are intended to satisfy the requirements for the 1997 National Ambient Air Quality Standard (NAAQS) and the 2008 NAAQS for ozone.

The proposed amendments to the RACT II determination, if finally approved, will be incorporated into a revised operating permit (66-000001) for the facility. The relevant RACT II requirements will be submitted to U.S. EPA as a revision to Pennsylvania’s SIP and will remain in effect until replaced pursuant to 40 CFR Part 51 and approval by United States Environmental Protection Agency (EPA). Requirements that are not part of the RACT II determination will be excluded from the SIP submittal. The following is a summary of the proposed amendments to the RACT II determination for this operation that will be submitted to the EPA as a SIP revision:

- P&G has requested to add the following emissions limits:
  - A NOx emissions limit of 0.25 lb/MMBtu for the following sources: 031, 032A, 034A.
  - A NOx emissions limit of 0.17 lb/MMBtu for the following sources: 501, 502, 503, 505, and 506.
  - A NOx emissions limit of 0.10 lb/MMBtu for the following sources: 504.
  - A NOx emissions limit of 0.24 lb/MMBtu when firing natural gas and 0.41 lb/MMBtu when firing paper fines for source 033A.
  - An emissions limit of 9 ppmvd VOC at 15% O2 and 42 ppmvd NOx at 15% O2 for source 035.
  - An emissions limit of 5 ppmvd VOC at 15% O2 and 42 ppmvd NOx at 15% O2 for source 038.
  - A NOx emissions limit of 0.14 lb/MMBtu on a 3-hr average for sources 507 and 508.
  - A VOC emissions limit of 105 tons/year for source ED1.

- The following sources are exempt from RACT II requirements for VOC (106, 107, and 108) and for NOx (106 and 107).
- P&G will meet the presumptive RACT II VOC emissions limit for sources 035 and 038, and the NOx emissions limit for sources 035, 038, and 504.
- P&G has requested that sources CP2, CV1, CV2, and ST5 be exempt from RACT II requirements for VOC due to these sources being subject to 25 Pa. Code § 129.52, 25 Pa. Code § 129.67, and/or 25 Pa. Code § 129.77.
- P&G has requested that the use of low-VOC additives be RACT for VOC for sources DP18 and PG9.
- P&G has requested that the continued closure of source LF1 be RACT for VOC.

The operating permit will contain additional recordkeeping and operating restrictions designed to keep the facility operating within all applicable air quality requirements.

Flood Risk Management Maintenance Project in York
City, York County: (York, PA Quadrangles, from Lat: 39°
56' 52.81"; Long: -76° 43' 24.58"

On April 15, 2019, ACOE requested a state water
quality certification from the Department of Environment-
al Protection (Department), as required by Section 401 of
the Clean Water Act (33 U.S.C.A. § 1341), to ensure that
the operation and maintenance of the Indian Rock Dam/
Codorus Creek Flood Risk Management (FRM) Main-
tenance Project will protect water quality in this Common-
wealth through compliance with State water quality
standards and associated State law requirements, which
are consistent with the requirements of the Clean Water
Act.

The proposed project consists of floodwall replacement
near Penn Street Bridge, masonry floodwall repairs near
Market Street Bridge, riprap repair and installation near
South Richland Avenue Bridge and drainage conduit
maintenance, repair or abandonment throughout the
FRM project.

The Department anticipates issuing a State water
quality certification to the applicant for the Indian Rock
Dam/Codorus Creek Flood Risk Management (FRM)
Maintenance Project that will require compliance with
the following State water quality permitting programs,
criteria and conditions established pursuant to State law
to ensure that the Indian Rock Dam/Codorus Creek Flood
Risk Management (FRM) Maintenance Project does not
violate applicable state water quality standards set forth
in 25 Pa. Code Chapter 93:

1. Erosion and Sediment Control Permit—Applicant
shall comply with the Department's Chapter 102 Erosion
and Sediment Control requirements pursuant to the
Commonwealth's Clean Streams Law and Storm Water
Management Act (32 P.S. §§ 680.1—680.17), and all
applicable implementing regulations (25 Pa. Code Chap-
ter 102).

2. Water Quality Monitoring—The Department retains
the right to specify additional studies or monitoring to
ensure that the receiving water quality is not adversely
impacted by any operational and construction process
that may be employed by Applicant.

3. Inspection—The Indian Rock Dam/Codorus Creek
Flood Risk Management Maintenance Project, including
all relevant records, are subject to inspection at reason-
able hours and intervals by an authorized representative
of the Department to determine compliance with this
State Water Quality Certification, including all required
State water quality permits and State water quality
standards. A copy of this certification shall be available
for inspection by the Department, or an authorized
representative thereof, during such inspections of the
Indian Rock Dam/Codorus Creek Flood Risk Management
Maintenance Project.

4. Transfer of Projects—If Applicant intends to transfer
any legal or equitable interest in the Indian Rock Dam/
Codorus Creek Flood Risk Management Maintenance Project which is affected by this State Water Quality Certification, Applicant shall serve a copy of this certification upon the prospective transferee of the legal and equitable interest at least thirty (30) days prior to the contemplated transfer and shall simultaneously inform the Department Regional Office of such intent. Notice to the Department shall include a transfer agreement signed by the existing and new owners containing a specific date for transfer of certification responsibility, coverage, and liability between them.

5. Correspondence—All correspondence with and sub-
mittals to the Department concerning this State Water
Quality Certification shall be addressed to: Department of Environmental Protection, Southcentral Regional Office, Program Manager, Waterways and Wetlands, 909 Elmerton Avenue, Harrisburg, PA 17110

6. Reservation of Rights—The Department may sus-
pend or revoke this State Water Quality Certification if it
determines that Applicant has not complied with the
terms and conditions of this certification. The Department
may require additional measures to achieve compliance
with applicable law, subject to Applicant’s applicable
procedural and substantive rights.

7. Other Laws—Nothing in this State Water Quality
Certification shall be construed to preclude the institution
of any legal action or relieve Applicant from any responsi-
bilities, liabilities, or penalties established pursuant to
any applicable federal or state law or regulation.

8. Severability—The provisions of this State Water
Quality Certification are severable and should any provi-
sion of this certification be declared invalid or unenforce-
able, the remainder of the certification shall not be
affected thereby.

Prior to issuance of the final State Water Quality
Certification, the Department will consider all relevant and
timely comments, suggestions or objections submitted
to the Department within 30 days of this notice. Written
comments should be submitted by e-mail to RA-EPWW-
SCRO@pa.gov or by mail at the previously listed address

TREATMENT PLANT REHABILITATION PROJECT
ADVERTISEMENT

The following rehabilitation project is currently being
advertised:

At the direction of Woodland’s Bank, the Administrator
of the Antrim Treatment Trust, the Department of Envi-
ronmental Protection is soliciting interest/cost proposals
from eligible contractors to carry out the rehabilitation of
the Antrim Mine Drainage Treatment Plant in Duncan
Township, Tioga County, PA. Plans and specifications for
the rehabilitation have been developed by BioMost, Inc. of
Mars, PA.

A pre-proposal site meeting is scheduled for Wednesday,
May 22, 2019 at 10 a.m. to review plans at the plant with
all interested parties. Representatives of BioMost, Inc.
will be on hand to explain the tasks to be carried out to
complete the project. A phased or divided approach with multiple smaller contracts will be considered.

This is the second pre-proposal meeting set to be scheduled. Representatives of the Antrim Treatment Trust deemed that there was insufficient contractor representation at the first meeting to assure competitive bidding.

To assure an adequate number of specification packages at the site meeting, preregistration is necessary via a letter of interest or verbal confirmation. Preregister through Aaron Pontzer, Mining Permit and Compliance Specialist, Moshannon District Office, Department of Environmental Protection, 186 Enterprise Drive, Philipsburg, PA 16866, no later than 3:30 p.m., May 20, 2019. Telephone inquiries shall be directed to Aaron Pontzer at 814.342.8200.

**Project Overview:** Rehabilitation of the treatment plant will include but is not limited to the following tasks: preparations, recovery, and transport of an existing 50 ton, 40-foot tall, 12-foot diameter lime silo from Summitville, PA to Antrim; site preparation at Antrim including excavation, preparation of new concrete footers or foundations, and drilling through existing foundations; extensive relocation and replumbing of multiple lines up to 12 inches in diameter; installation of new plumbing; setting of prestressed concrete tankage with chemical feed and air blower systems; setting of the lime silo; installation of electrical conduit; setting of multiple pumps; replumbing to existing clarifier tank; revegetation of all disturbed areas; implementation of erosion and sedimentation controls and removal of those controls when stabilization is achieved.

The Department published notice of its intent to allocate funding for these payments at 48 Pa.B. 7461 (December 1, 2018). The Department received no comments during the 30-day comment period and will implement the change as described in the notice of intent.

Fiscal Impact

The FY 2018-2019 impact, as a result of the funding allocation for these payments, is $14.636 million ($6.989 million in State general funds and $7.647 million in Federal funds).

(5) Failure to Properly Dispose of Empty Liquor Containers. For any restaurant, hotel or club licen-see, his servants, agents or employees, to fail to break any package in which liquors were contained, except those decanter packages that the board determines to be decorative, within twenty-four hours after the original contents were removed therefrom, unless the licensee participates in either a municipal recycling program, in accordance with the act of July 28, 1988 (P.L. 556, No. 101), known as the “Municipal Waste Planning, Recycling and Waste Reduction Act,” or a voluntary recycling program .” 47 P.S. § 4-491(5) (Emphasis added).

In response to Regulatory Analysis Form # 10, the Board explains that the intent behind the new require-ments in Subsection (c) paragraph (3), which applies to licensees that recycle voluntarily at drop off locations, is to “ensure that the licensee has made the effort to become informed as to how to recycle in the county.” Under proposed Subsection (d), licensees that pay a municipality or private entity for curbside recycling and those that voluntarily recycle at drop off locations must maintain the “proof in writing” as part of their operating records in conformance with Section 493(12) (relating to Failure to have records on premises) of the Liquor Code.

Commentators are concerned that a minor oversight in recordkeeping could subject a licensee to additional penal-ties under the Liquor Code. Failure to provide “proof in writing” could result in a fine, suspension and/or revoca-tion of license. 47 P.S. § 4-471(a) and (b). The Board should explain the reasonableness of the record keeping requirements and how the penalties for noncompliance are consistent with the Board’s stated intent. It should also address how the Board’s approach supports licensees’ efforts to recycle.

Representative Lawrence submits that “proof in writing” could be met by simply requiring licensees to post a placard indicating whether they participate in a municipal recycling program or a voluntary recycling program. PRLA contends that the proposed rulemaking does not recognize the challenges that have evolved since the enactment of Act 77 and calls for a “more holistic legislative fix.” Given the diverse viewpoints on how to improve upon the rulemaking, we would encourage the Board, as it prepares the final rulemaking, to communicate with the regulated community regarding its concerns. We will review the Board’s response to the issues raised by commentators as part of our consideration of the final regulation.

2. Miscellaneous Clarity.

• The Board’s response to RAF # 14 states that it circulated a copy of the proposed regulation to the Bureau of Liquor Code Enforcement. The Board does not indicate whether it sought input from the regulated community in the development of the regulation. In the RAF to the final form regulation, the Board should specify the extent to which it conducted outreach to licensees.

• Section 5.43(c)(3) contains a “Proof of Recycling” form within the text of the Annex. Section 2.12 of the Pennsyl-vania Code and Bulletin Style Manual recommends forms not be codified in the Pennsylvania Code. The manual recommends that the form be referred to in the regulation or the regulation should list the information to be re-quired. Moreover, we are concerned that a licensee may not know how to obtain this form. The Board should either remove it from the Annex and make it available on its website or explain how incorporating it into the rulemaking is beneficial to the regulated community.

• Section 5.43(c)(4)(A) requests the name, location and hours of operation of the recycling facility where a licensee disposes recyclable materials. This information is similar to the information already required on the “Proof of Recycling Form.” § 5.43(c)(3) Since the Board wishes to have a licensee provide at least two additional records from the municipality with oversight of the drop off locations, we suggest the Board clarify the provision by removing the redundant information and revising the form in Section 5.43(c)(3) to include hours of operation of the recycling facility.

PENNSYLVANIA BULLETIN, VOL. 49, NO. 20, MAY 18, 2019
PENNSYLVANIA INFRASTRUCTURE INVESTMENT AUTHORITY
DEPARTMENT OF ENVIRONMENTAL PROTECTION

Clean Water and Drinking Water State Revolving Fund Programs; Federal Fiscal Year 2019 Intended Use Plans

The Pennsylvania Infrastructure Investment Authority (PENNVEST) and the Department of Environmental Protection (Department) have prepared the Federal Fiscal Year (FY) 2019 Intended Use Plans (IUP). These plans include a list of drinking water, wastewater treatment, nonpoint source and pollution abatement projects to be considered for a design and engineering or construction loan or grant from funds the Commonwealth expects to receive from the Federal FY 2019 Drinking Water State Revolving Fund (DWSRF) and Clean Water State Revolving Fund (CWSRF) programs.

In accordance with United States Environmental Protection Agency (EPA) guidelines on the development of the IUPs, a public meeting has been scheduled for May 29, 2019, at 1:30 p.m. in the 2nd Floor Auditorium, Rachel Carson State Office Building, 400 Market Street, Harrisburg, PA. This meeting is scheduled for the purpose of receiving comments from the public regarding the Federal FY 2019 IUPs. Interested persons are invited to express their views on the narrative portion of the IUPs, the DWSRF set-aside work plan or the priority rating or ranking of projects on the IUPs. Persons wishing to offer comments at the public meeting should contact the Division of Municipal Facilities at the address or telephone number listed as follows or by e-mail to jaypatel@pa.gov by 4 p.m. on May 28, 2019. When written statements are prepared and will be submitted at the meeting, speakers will be asked to restrict the oral portion of the statement to a summary of the written comments.

The projects to be considered for a loan or grant from the DWSRF and CWSRF programs must meet the Federal requirements for funding in accordance with the Federal Safe Drinking Water Act (42 U.S.C.A. §§ 300f—300q-27) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1388). Accordingly, the projects included in the IUPs are expected to meet the requirements applicable to the use of the DWSRF and CWSRF loan or grant funds. Projects listed in the FY 2019 IUPs are on the Commonwealth's Project Priority Lists (PPL) and are expected to proceed with design and engineering or construction within the next 2 years. A project must appear on a PENNVEST-approved IUP before it can receive a loan or grant from the State Revolving Fund programs. A project's readiness to proceed and the reasonable availability of alternative funds also have a bearing on project selection for the IUPs. Consequently, the rank ordered list of projects on the PPLs does not solely dictate the order in which projects will be chosen for inclusion in an IUP.

The DWSRF will be capitalized with an approximated maximum of $31.6 million in Federal funds and $6.3 million of State funds. Approximately $8.5 million of these funds will be set aside for technical assistance to small systems, operator training and certification, and source water assessment and protection as authorized under the Federal Safe Drinking Water Act. The DWSRF IUP also includes a narrative work plan that describes how these set-aside funds will be used. PENNVEST is also allocating an additional $1.4 million for administrative purposes. Finally, an additional $6.3 million must be set aside for additional subsidization to disadvantaged communities. The FY 2019 DWSRF grant does not have a requirement to set-aside funding for green infrastructure projects. However, the Commonwealth will continue to promote green infrastructure projects. These projects can fall into one of four categories: (1) water efficiency; (2) energy efficiency; (3) environmentally innovative; and (4) green stormwater infrastructure and meet the EPA criteria for green infrastructure.

The CWSRF will be capitalized with an approximated maximum of $63 million of Federal funds and approximately $12.6 million of State funds. One million dollars will be set aside for program administration costs. Finally, an approximated maximum of $18.9 million may be set-aside for additional subsidization to disadvantaged communities and approximately $6.3 million must be set-aside for green infrastructure projects that fall into one or more of the following categories: (1) water efficiency; (2) energy efficiency; (3) environmentally innovative; and (4) green stormwater infrastructure and meet the EPA criteria for green infrastructure.

It is not necessary to appear at the public meeting to present comments on the narrative portion of the IUPs, the set-aside work plan or the PPLs. Interested persons may also submit written comments to the Department through Monday, June 17, 2019. Comments, including comments submitted by e-mail, must include the originator's name and address. Commentators are encouraged to submit comments using the Department's online eComment system at www.ahs.dep.pa.gov/eComment or by e-mail to ecomment@pa.gov. Written comments can also be submitted by mail to the Policy Office, Department of Environmental Protection, Rachel Carson State Office Building, P.O. Box 2063, Harrisburg, PA 17105-2063. Use “Clean Water and Drinking Water State Revolving Funds” as the subject line in written communication.

Persons in need of accommodations as provided for in the Americans with Disabilities Act of 1990 should contact Jay Patel at (717) 705-4090 or through the Pennsylvania AT&T Relay Service at (800) 654-5984 (TDD users) or (800) 654-5988 (voice users) to discuss how the Department may accommodate their needs.

A copy of the IUPs, ranking frameworks, the PPLs and the DWSRF set-aside work plan may be obtained by contacting Jay Patel, Division of Municipal Facilities, at (717) 705-4090 or through the Department's web site at http://www.dep.pa.gov/Business/Water/CleanWater/InfrastructureFinance. On January 17, 2019, the Pennsylvania Public Utility Commission (Commission) entered an Order, releasing a staff report titled “Home Energy Affordability for Low-Income Customers in Pennsylvania” (Report). The Report found, inter alia, that inconsistencies and limitations in reported data impacted the analysis and evaluation of Customer Assistance Programs (CAPs).

In the January 17 Order, the Commission recognized the need for NGDCs and EDCs to (1) standardize data gathering and reporting; (2) establish standard definitions for terms; (3) track and report data consistently (e.g., income verification/confirmed low income); and (4) track and report additional data elements to enhance the evaluation of CAPs. January 17 Order at 18.

Therefore, the January 17 Order directed staff in the Bureau of Consumer Services (BCS) and the Law Bureau to convene, no later than July 31, 2019, a USR working group to standardize universal service reporting protocols for data definitions, tracking, and reporting, and the Commission directed all NGDCs and EDCs to participate in the USR working group. January 17 Order at 23.

The USR working group shall conclude its work no later than December 31, 2019 and BCS shall provide a consensus/non-consensus report to the Commission prior to January 31, 2020. January 17 Order at 23.

With this Secretarial Letter, the Commission announces establishment of the USR working group. The Commission invites interested stakeholders to participate. The first meeting of the working group will be held in July 2019, in the Keystone Building, Harrisburg. Utilities and interested stakeholders should email ra-pc-uswg@pa.gov by May 31, 2019 to inform the Commission of your intent to participate. All utility participants and interested stakeholders will be provided with information and comment requests, and notified of specific meeting dates, times, and locations, via email.

12. Pursuant to the provisions of the applicable Commonwealth statutes and regulations, the Commission has jurisdiction over the subject matter of this complaint and the actions of Respondent related thereto.

II. Background

13. Section 3011 of the Public Utility Code, 66 Pa.C.S. § 3011, authorizes the Commission to establish a Universal Service Fund ("USF") to ensure the availability of basic telecommunications services to all Pennsylvania residents.

15. Respondent is a contributing telecommunications provider.

16. On December 15, 2017, the Commission’s third-party USF Administrator, GVNW Consulting, Inc. ("GVNW"), mailed to Respondent a Pennsylvania USF 2018 Remittance Voucher that was based on revenues for the 2016 calendar year that Respondent reported to GVNW in its Pennsylvania USF Administrator Development of Assessment Data Request. Respondent’s total annual USF Assessment amount for 2018 was $146.62.

17. Respondent’s first monthly USF Assessment payment for 2018 was $12.22 and due on January 16, 2018.

19. GVNW continued to mail to Respondent monthly USF vouchers for the 2018 calendar year.

20. On June 14, 2018, Respondent submitted payment in the amount of $73.30 to be applied towards its USF Assessments for the 2018 calendar year.

21. Upon receipt of Respondent’s payment, late fees in the amount of $1.65 were added to Respondent’s USF Assessment balance related to the 2018 calendar year.2

22. Subsequent to Respondent’s payment, GVNW continued to mail to Respondent monthly USF vouchers for the 2018 calendar year.

23. On or about October 16, 2018, Spencer Nahf, of the Commission’s Bureau of Technical Utility Services ("TUS"), contacted Respondent, by telephone, regarding payment of Respondent’s remaining, outstanding USF Assessments related to the 2018 calendar year and left a voicemail for Respondent, which was not returned.

24. On October 17, 2018, I&E sent Respondent a notice regarding its remaining, outstanding USF Assessments related to the 2018 calendar year.

25. To date, Respondent has not submitted payment or contacted the Commission regarding its remaining, outstanding USF Assessment balance for the 2018 calendar year.

26. Respondent’s current, outstanding USF Assessment balance related to the 2018 calendar year is $74.97.3

---

1 Contributing telecommunications providers are telecommunications carriers that provide intrastate telecommunications services.
2 Pursuant to 52 Pa. Code § 63.169(b), late fees are charged at 1.5% per month pro rata per item on the delinquent contribution.
3 This amount does not include late fees for Respondent’s remaining, outstanding USF Assessment balance related to the 2018 calendar year. The total amount of late fees due will be calculated upon receipt of payment of the remaining, outstanding USF Assessment balance by GVNW.
III. Violation

27. All allegations in paragraphs 1—26 are incorporated as if fully set forth herein.

28. Respondent failed to satisfy its monthly Universal Service Fund Assessments for six (6) months of the 2018 calendar year. If proven, this is a violation of 52 Pa. Code §§ 63.161—63.171. The Bureau of Investigation and Enforcement’s proposed civil penalty for this violation is 15% of the outstanding USF Assessments or a minimum of $50, whichever is greater. Therefore, I&E’s proposed civil penalty for this violation is $50.

Wherefore, for all the foregoing reasons, the Pennsylvania Public Utility Commission’s Bureau of Investigation and Enforcement respectfully requests that:

(a) Respondent be ordered to pay its outstanding USF Assessments related to the 2018 calendar year, including late fees, and the requested civil penalty for the above-described violation; and

(b) If payment of the USF Assessments, late fees, and civil penalty is not made, the Bureau of Investigation and Enforcement requests that:

(1) the Commission issue an Order to cancel the Certificate of Public Convenience issued to Respondent;

(2) this matter be referred to the Pennsylvania Office of Attorney General for appropriate action; and

(3) the Commission grant such other relief as it deems appropriate.
